

TO ALL OUR PARTNERS

Parma, the 11th May 2016

Subject: DocuApp presentation

Cattani's first App was released last week on Apple Store (Ios system) and Play Store (Android system). Its name is DocuApp.

We live in a time of great technological transformation - an unprecedented, radical transformation. Research and development are the forces driving this transformation.

With modern technology production has become flexible, less expensive, safer, environmentally sustainable and low in energy consumption. These needs can no longer be procrastinated.

Progress is running fast and we cannot lag behind, you either keep up-to-date or the market will wipe you out.

Information is on the same path: today, through the Internet we can have all the information we need, whether we are buying a car or selling one. Internet can help us to keep pace with progress.

Thank you for your attention.

Best regards,

Augusto Cattani

DocuApp - By means of the App you can view or download a PDF file of all the documents relevant to your CATTANI product, simply by scanning the barcode or entering the data manually. Conformity certificates and commercial and technical documentation are available for the user.
